AGARWOOD TREE
Plantation Ownership

The Most Valuable Wood In The World

“Secure your family’s future by owning your own fully managed Agarwood Plantation”

www.plantationsinternational.com
Growing Your Future
Agarwood is the resinous heartwood that comes from the Aquilaria tree. Aquilaria is a fast-growing subtropical forest tree that Plantations International grows on sustainably managed Plantations in Indonesia and Malaysia.

Agarwood when distilled into oil produces one of the most valuable raw commodities in the world. Agarwood oil also known as “OUD” is a key ingredient in some of the most expensive fragrances in the world. Top name brands like Versace, Calvin Klein, Hugo Boss to name a few all have premiere fragrance lines that feature OUD oil.

Due to its high demand and limited supply high grade agarwood chips have sold for over USD 10,000 a kilogram and the distilled OUD oil has sold for over USD 50,000 per kilogram.

"Indonesia is the largest exporter of Agarwood Chips in the world, over 4 million kilograms yearly, a staggering 87% of the world’s supply"
Agarwood is the most expensive raw ingredient in the world with quality OUD Oil selling for in excess of $50,000 USD per kilogram.

THE GLOBAL AGARWOOD AND OUD OIL MARKET

Agarwood Market Demand

The current global market for Oud Oil and other related Agarwood products is estimated to be in the range of over USD 12 billion and is ‘growing rapidly’. The global perfume and fragrance industry, the major industry buyer of Oud Oil, is expected to exceed US$ 36 billion in 2020 according to research undertaken by global research analysts.

Two of the largest Importers of Agarwood are Taiwan and Japan, where they import in excess of 50,000 tonnes annually with a purchase value in excess of 3 billion USD per year.

The largest and most significant Market by far is the Middle East. One well known Saudi Arabian retailer specializing in Agarwood has over 750 retail outlets across 35 countries with over 1,400,000 customers and is one of the world’s largest perfume retailers in a market worth US$ 6.3 billion a year.

Today due to very strict growing constraints, Agarwood farmers can only supply 20% of the world’s Agarwood demand, fueling its meteoric price increase year after year.
Only 20% of market demand is met yearly, forcing prices to rise in excess of 16% per annum.

Today Plantations International offers you a simple, easy and hands free way for you to own your own fully managed Agarwood “Micro Plantation” in Yogyakarta, Indonesia and be part of the USD 33 billion dollar fragrance industry without all the stress and hassle of doing it yourself.

The professionals at Plantations International will take care of everything for you from Soil to Market. All you have to do is sit back, relax and watch your trees grow.

The main advantage of owning your own fully managed plantation is that it allows for ownership in a tangible asset that provide a much safer alternative to stocks, bonds and traditional equities. Plantation ownership is particularly attractive to those who wish to own a profitable asset that is not affected by the typical volatility in the financial markets and that offers guaranteed returns.

Plantations International has all the knowledge, skills and experience to accomplish all the above effortlessly for you, as a matter of fact we do it every day!

- **Fully Managed & Hands Free**
  - We Plant For You
  - We Grow For You
  - We Harvest For You
  - We Sell For You

*From Soil - To Oil - To Market*
Forestry plantations have over the last decade moved from the alternative market space to become the mainstream asset class of choice for sophisticated individuals looking to diversify their portfolios and hedge their risk against traditional markets.

PLANTATIONS OWNERSHIP HIGHLIGHTS

- High Return Portfolio Diversification
- Nett returns 16% per annum
- Agarwood is a USD 12 Billion a year industry
- Existing end user off-take agreements in place
- Proven & experienced management team
- Completely transparent and secure
- Fully managed “Hands-Free” project

Over the past 20 years, timber has outperformed all markets while maintaining low volatility. Timber offers individuals a smart way to diversify their holdings.
With abundant rainfall, a very affordable labor force and some of the world most fertile soil, Indonesia is a plantation owner’s dream come true.

Also, Indonesia is your perfect investment destination. With its dynamic and burgeoning middle class and its large and growing domestic market, combined with an ever improving investment climate has made Indonesia the second largest economic G20 powerhouse in Southeast Asia next to China with a real GDP growth of 5.02% in 2016.

- Foreign Direct Investment (FDI) was up 19% year on year in 2016
- Global Competitiveness Index ranks Indonesia 34th out of 148 countries.
- Indonesia will be one of the 10 biggest economies in the world by 2022.
- The GDP of Jakarta is the equivalent to that of the whole of Malaysia.

A quote from **Indonesian President Joko Widodo** to the **Wall Street Journal**

*Ladies & Gentleman, I stand here today, to invite you to join me and my people, on an incredible journey, on an incredible adventure, and to make incredible profits, and if you have any problems call me.*

"Financial Markets Go Up And Down, But Trees Keep On Growing!"
Plantations International is a multinational plantation and farm management company whose specialty is in providing sustainable agricultural and forestry “agroforestry” management and micro plantation ownerships services for its clients.

Plantations International has clients ranging from private individuals to large landholders and institutional asset class holders. We put teamwork, innovation and our passion for creating “Ethical & Sustainable Capital” at the heart of everything we do.

A growing number of high networth individuals are shoring up their positions with assets in the agroforestry sector in an effort to diversify their portfolios, as more traditional asset classes such as equity markets are growing in volatility.

Given the recent turbulence in global capital markets, people are ever increasingly looking towards agroforestry plantations and other tangible commodities for security. The agroforestry sector offers the ideal diversification from real estate and equity portfolios, providing a non-volatile market with high medium term returns and a very low risk ratio.

From the pre-conceptual planning stage to harvesting and marketing the final products, we strive to go the extra mile to exceed our client’s’ expectations.

Call Plantations International today and find out what we can do for you.

FREQUENTLY ASKED QUESTIONS

Q: Why should I add Forestry to my portfolio?

A: Due to its very low volatility, forestry is considered a very safe asset class. Forestry consistently outperforms most other asset classes such as stocks, bonds and fixed deposits. Agarwood is by far the most valuable wood in the world. Demand for Agarwood and Oud Oil is much higher than current supply levels, making Agarwood a safe and secure asset class to add to your portfolio.

Q: Why is the harvest term 7 years?

A: In most circumstances, it takes a minimum of 7 years for the Aquilaria tree to produce an economically viable level of agarwood. In fact in comparison to other high yield asset classes that have a minimum 10 year lock-in period, and offer you absolutely no guarantee on returns, 7 years is actually quite a short term period.

Q: Who are the main buyers of Oud Oil and Agarwood derived products?

A: The main buyers of Oud Oil and Agarwood:
- Fragrance Houses / Cosmetic Companies
- Pharmaceutical companies and companies producing traditional Chinese medicines
- OUD oil / Agarwood chips wholesalers

Q: Can I visit my Agarwood Plantation?

A: Absolutely Yes, in fact we highly encourage you to visit your plantation and see your trees. Just let us know of your desired visit dates and we will make complimentary flight and hotel arrangements for you and arrange a guided tour of your plantation and our facilities.

Q: In which currency are proceeds paid?

A: All proceeds by default are paid in USD unless you request otherwise. If you request any other currency besides USD, currency conversion fees may apply. You will receive copies of all currency conversion statements.

Q: Why does Plantations International offer plantation ownership opportunities to third parties and not just do it themselves?

A: Plantations International made an economically strategic decision to offer third party plantation ownership opportunities alongside our own trees in order to accelerate our corporate growth and become the recognized market leader in the shortest time frame without incurring bank debt.

Q: How and when will I receive the proceeds from my trees?

A: Within 30 days of Plantations International harvesting your trees and selling to one of our off-take partners we will transfer your proceeds minus our 20% harvesting and management fees to an account of your choice.

Q: Are there any additional fees or hidden charges?

A: No, all management, administration and maintenance fees are included upfront. We only get our 20% harvesting and management fee upon successful sale of your Agarwood derived product.
